

1)	$50\% = \frac{1}{2}$ so we can $\div 2$	$10\% = \frac{1}{10}$ so we can $\div 10$
	$25\% = \frac{1}{4}$ so we can $\div 4$	$1\% = \frac{1}{100}$ so we can $\div 100$

3)	25% of £840 = £210	10% of 6kg = 600g	1% of 3400 = 34
	25% of 5L = 1250ml	1% of 7km = 70m	50% of 16.1 = 8.05

1) False. To find 25% you need to divide by 4 as 25% is equivalent to $\frac{1}{4}$.

True. To find 1% we need to divide by 100. We can do it step by step by dividing by 10 twice.

This is false.

1% of 8600 = 86 and 10% of 890 = 89

86 < 89 1% of 8600 < 10% of 890

2) Joel's statement is incorrect because numbers which are not a multiple of 10 can still be divided by 10 but the answer will contain a decimal. $342 \div 10 = 34.2$
