

CLASS one NEWS

During our week this week, we have continued our learning about superheroes, looking more closely at real life super heroes. In particular, we have thought about what it's like to be a paramedic. We've talked about what an ambulance is, what they need inside, travelling to hospital. We have also discussed the pantosaurus and the importance of being safe. Our superhero crests have now been complete as part of our super hero training. They all look amazing! In maths, we have had a focus on our number formation of number 1-10, learning new rhymes to help us remember how to write them, as well as recapping on our number bonds to make 10 in our numicon city. When we come back, we will be continuing our learning on real life superheroes, looking particularly at the police and how they help us.

QUESTIONS

How many different ways can you make 10?

What was the main part of pantosaurus's story?

If Zog took his patience to a flying hospital, what would it look like?
